Additional exams are available for a fee of \$75 per person (\$20 per person for gov't employees/students).

Thomas Mitchell

Nicholas Orso

Instructor Descriptions: **Mr. Mitchell** has over 30 years of experience in procurement, management, and dispute resolution including expert witness testimony for construction claims. He has provided courses and seminars on a wide variety of topics including construction management, CPM scheduling, claims avoidance, writing, and dispute resolution. **Mr. Orso** has over 18 years of construction consulting experience. Mr. Mitchell and Mr. Orso have worked in the federal, state, local, and private sectors with a variety of project types including marine, highway, transit, educational, hospital and health-care, military, aviation, hotel, and other commercial construction. They both have extensive experience resolving claims that have been escalated to litigation by providing expert testimony on matters related to quality management, entitlement, damages, and delays for dispute resolution of construction claims.

Course Description: Despite the best efforts to have projects delivered without any delays or construction issues, they do occur; and some of them may result in claims. This course discusses the basics of claims arising under construction contracts. It addresses issues related to types of construction claims, the process of claims, and how to analyze claims.

At the end of this class, participants will be able to:

- Discuss delay-related claims
- Identify the process of claims, including change order requests, notices of claims, settlement, arbitration/mediation, and trials
- Describe how to analyze claims
